

Introducing All-Coast Genuine Custom Coating

A unique coating process that offers outstanding results at significant cost savings. Factory-applied in a carefully controlled environment, All-Coast Genuine Custom Coating delivers exceptional results no field-applied coating can duplicate.

What makes All-Coast Genuine Custom Coating unique?

An innovative encapsulation process:

- *Optimal temperature and humidity levels to stabilize moisture.* We fully control the application environment — impossible in the field.
- *Flood coating.* Our machine applicator surrounds wood with your choice of finish.
- *Precise, even application.* Pressure rollers spread coating evenly.
- *Custom-quality machine finish.* High-speed brushes imbed the factory finish for maximum protection.

All-Coast Genuine Custom Coating provides:

- Outstanding, uniform finish quality and color
- Freedom from project delays due to weather or finish subcontractors
- Cost-saving material stabilization
- Longer-lasting durability
- More consistent performance
- Industry-leading warranty
- Instant curb appeal
- Reduced environmental impact by recycling all coating material not applied to the substrate.
